PROFESSIONAL SUMMARY

Strategy and operations professional with experience driving growth, revenue-oriented initiatives, and operational efficiency in high-growth startup environments across healthcare and deep-tech. Strong track record of translating complex data into actionable insights, managing cross-functional projects simultaneously, and executing strategic initiatives from analysis through to measurable implementation. Background spans strategy consulting-style project work, PMO, and early-stage company building. Deep healthcare domain expertise—digital health, medtech, AI-driven clinical products—combined with an entrepreneurial mindset and a bias for impact. Fluent English (C1). EU work authorization.

PROFESSIONAL EXPERIENCE

Founder – Deep-Tech AI (Stealth) Feb 2026 – Present *Impossible Founders Programme • Hamburg, Germany*

- Building a non-invasive AI-driven biomarker detection platform from zero; managing all strategic, operational, and commercial workstreams simultaneously in an early-stage, resource-constrained environment.
- Conducting structured B2B customer discovery and problem-market fit validation across clinical and commercial stakeholders; synthesizing findings into product and go-to-market strategy decisions.
- Awarded the nFactorial × Higgsfield Growth Management Grant 2026—competitive grant from a leading tech accelerator and unicorn-stage AI company recognizing strategic and operational capability.
- Embedded in Hamburg's deep-tech ecosystem (AI BEAVERS, Health Apéro, Impossible Founders Demo Days); building cross-sector networks across founders, investors, and healthcare operators.

AI Product Strategy — eHealth Startup Sep 2025 – Dec 2025 *Fighters Apprentice @ STATION F • Paris, France*

- Embedded at Europe's largest startup campus (1,000+ startups, 45+ programmes); worked directly with CTOs and founders to align AI capabilities with strategic product and growth requirements across portfolio companies.
- Led rapid prototyping and iteration cycles for a digital health product (Mila Mindcare, an AI-enabled DTx for diabetes distress), coordinating across product, clinical, and technical workstreams to hit delivery milestones.
- Operated in a fast-paced, ambiguous environment with minimal infrastructure—prioritized ruthlessly, made responsible trade-offs, and delivered working solutions under time pressure.

Strategic Project Lead – AI & Digital Transformation Feb 2025 – Oct 2025 *Lohmann GmbH & Co. KG • Neuwied, Germany*

- Scoped, planned, and executed a complex strategic project from blank page to deployed multi-stakeholder operational platform—integrating ERP and CAD data sources via custom pipelines to enable data-driven decision-making.
- Developed and tracked KPIs for production workflow efficiency, cost prediction, and waste reduction; quantitative post-deployment evaluation confirmed measurable improvements in decision speed and cross-functional accuracy.
- Ran qualitative stakeholder research (interviews across 3 departments) to surface adoption barriers; designed and executed a structured change management pathway that improved uptake in a risk-averse regulated environment.
- Reported findings and strategic recommendations directly to senior leadership; translated complex analytical outputs into clear, structured presentations for non-technical decision-makers.
- Reference: Volker Lutz, Head of Health Patch Technology Center, Lohmann GmbH.

Strategy & Operations Intern Apr 2024 – Aug 2024 *iLoF – Intelligent Lab on Fibers • Porto, Portugal*

- Supported C-suite directly in PMO activities and strategic planning for an AI-driven diagnostics startup; delivered strategy consulting-style analyses to inform product and revenue decisions across multiple simultaneous workstreams.
- Led the full operational transformation of legacy workflow systems to a modern digital stack, achieving a 90% digitization rate—directly improving team efficiency and data visibility across the organization.
- Developed, tracked, and reported on KPIs across operational and product development initiatives; synthesized performance data into structured executive briefings for leadership decision-making.
- Conducted competitive market research and strategic analysis to inform early-stage product roadmap
- Coordinated cross-functional teams across product, legal, and commercial functions to align execution with growth strategy and investor milestones.

ENTREPRENEURIAL EXPERIENCE

Co-Founder & CEO May – Aug 2021 *Mutter – Mental Health Platform • Astana, Kazakhstan*

- Founded the first mental health platform in the region connecting patients with specialists; raised angel investment, led a team of 4 from concept through MVP. Full P&L and strategic ownership.

Co-Founder Dec 2022 – 2023 *Ptereon – Affordable Hand Prosthetics • Astana, Kazakhstan*

- Co-founded an interdisciplinary venture (robotics + CS + health science) achieving 10× cost reduction versus market alternatives; led multi-institution collaboration and managed commercial and technical stakeholder relationships.

Project Manager Jun – Aug 2022 *WeLoveFlutterFlow • Remote*

- Built and managed a cross-functional team of 10 (2 PMs + 8 developers); standardized processes and workflows, delivering a 45% improvement in process efficiency across a portfolio of 4 concurrent projects per month.

EDUCATION

MSc Health Engineering — Graduated with High Honours 2023–2025 *HAW Hamburg · P. Porto · Université de Lille • Germany · Portugal · France*

- Specializations: Medical Systems Engineering, Digital Health, Healthcare Management, Regulatory Compliance (MDR/IVDR). Erasmus Mundus Joint Masters (EMJM) Scholar.
- Master Thesis (Lohmann GmbH): Designed and deployed an AI-driven decision-support system in a manufacturing environment—full project lifecycle from strategic scoping through to quantitative impact evaluation.
- Awards: Erasmus Mundus Scholarship (European Commission) · Université Franco-Allemande Research Grant.

BSc Biological Science 2019–2023 *Nazarbayev University • Astana, Kazakhstan*

- Engineering and science foundation with emphasis on applied statistical methods, research design, quantitative analysis, and biomedical research methods.

SKILLS

Strategy & Operations: Strategic planning, KPI development & tracking, performance analysis, process improvement, operational efficiency, PMO

Analytics & Data: Data visualization, quantitative impact measurement, competitive analysis, market research, structured problem-solving, Python, MATLAB

Growth & Business Dev: B2B customer discovery, go-to-market strategy, stakeholder management, investor relations, cross-functional collaboration

Tools: Notion, MS Teams, HubSpot CRM, project management tools, data pipelines, API integrations

Healthcare Domain: Digital health, AI-driven clinical products, medtech market, MDR/IVDR, SaMD, EU AI Act, diagnostics

Languages: English (C1 – Professional) · Russian (C2 – Fluent) · Kazakh (Native) · German (A2) · French (A2)

RECOGNITION

- Impossible Founders — Accepted into Germany's most selective deep-tech incubator (2026).
- nFactorial × Higgsfield Growth Management Grant 2026 — Competitive award from a leading tech accelerator and unicorn-stage AI company.
- Rewire — Top 15, Germany's Biggest AI Hackathon 2026.
- Public Speaker: ACM Hub, Nazarbayev University, Human Rights Hub (Women in STEM, Women in Business).
